Kasper is a director in our Private Investment Funds team.

PRACTICE AREAS

Private Investment Funds

Kasper advises fund managers on the structuring, establishment and fundraising of private investment funds, as well as the legal and commercial matters involved in operating, scaling and developing fund platforms.

In our fund formation team, the advice always includes strategic considerations that support the fund manager's growth, including aligning fund structures with investment strategy and investor expectations, supporting efficient governance and decision-making, and helping create the foundations for future fundraising and platform development.

Kasper also advises institutional and professional investors on fund investments and co-investments, and brings prior M&A experience to secondary transactions. He is focused on joining the knowledge of fund formation and investor requirements with a practical approach to the commercial, operational and stakeholder considerations across the full fund lifecycle.
