Nanna is a financial controller, where she skillfully oversees financial transactions and ensures seamless daily operations. Her main responsibility is managing essential financial activities, enhancing efficiency through the strategic use of robotics technology, which reduces the need for manual input and streamlines our workflows.

Having pursued her education in business school, Nanna has supplemented her knowledge with specialized courses in economics and business law. This educational background has fortified her grasp of financial fundamentals and fined her analytical prowess, equipping her to effectively manage complex financial scenarios.

In our finance team, we prioritize teamwork and shared learning. We succeed together, always ready to lend a helping hand to each other and to our external clients. Our focus extends beyond individual achievements to collective success, which helps us meet our financial targets as a unified group. This collaborative spirit ensures we are supportive and inclusive, making our team stronger and more effective.
