Biogas & Biomethane

Practice area under Energy and Infrastructure

Plesner has extensive experience in the Danish biogas sector. We advise owners, investors, developers and operators on acquisitions and divestments, investments, financing, regulatory matters, gas-grid connection, feedstock and offtake arrangements, expansion projects and the commercial agreements underpinning biogas and biomethane assets.

As an example, our work has included these matters:

- Danish Bio Commodities (DBC) - Sale to St1 Biokraft: Advised Danish Bio Commodities (DBC), DBC Invest and their owners on the sale of the DBC biogas platform to St1 Biokraft, following extensive advice to the group on its investments, strategic acquisitions and development of its biogas platform.
- Lemvig Biogas - Sale to BioticNRG: Advised Lemvig Biogasanlæg and Lemvig Varmeværk on the sale of the Lemvig biogas plant to BioticNRG, managed by Palisade Real Assets, as part of a wider restructuring of the local energy and district heating system, including transaction structuring, asset transfers, municipal processes and financing matters.
- DBC Invest - Biogas Value Chain: Advised DBC Invest on a series of strategic acquisitions across the biogas value chain, including Nordic Green Engineering and Dalgas' biogas substrate business.
- HCS - Hashøj Biogas: Advised HCS on the sale of Hashøj Biogas to Shell Biogas, including the closure of the existing facility as part of the transaction to facilitate the development of a new biogas plant.
- Danish Bio Commodities - Off-take agreement: Advised Danish Bio Commodities on preparation and negotiation of its largest-ever offtake agreement with Landwärme.
- (Confidential) - CDR-credit agreement framework: Developed the concept, commercial structure and contractual framework for a novel carbon dioxide removal (CDR) credit arrangement in the biogas sector, covering the full value chain from capture of biogenic CO_2 through transport and permanent storage to certification, issuance and sale of CDR credits.
